PROJECTS

PropMan | *React* | *Express* | *PostgreSQL*   *Full-Stack Developer / August 2019 - Present*
Web app designed to increase communication between property owners and tenants
- Collaborated with a 5-person full-stack web development team to design an app in 5 weeks that provides clear visibility and access to important property documents and up-to-date progress on renter requests
- Architected a JSON-based server and data schema to provide persistent storage to the front-end of the application using Express and PostgreSQL
- Implemented front-end design and page views to website components based on a Figma framework using HTML, SCSS, and React

Eventr | *React* | *Node* | *SQL*   *Full-Stack Developer / July 2019 - Present*
Web app that simplifies organizing public and private events without social media
- Created a persistent Node.js API to provide user and event data to the front-end using SQL and SQLite
- Developing testing for any new server endpoints and query models using JEST
- Designed fully-functional and user-friendly front-end using React and CSS complete with animations and pleasing UI

Hogger | *React* | *Express* | *SQL*   *Full-Stack Developer / October 2019 - Present*
Web app that keeps track of disc golf scores and courses designed for mobile devices
- Developed app by creating basic Express API to store game and course data using SQL and serving to a React front-end that utilizes Bootstrap and web to mobile responsiveness
